Sep 6, 2020 JetBrains PhpStorm 2020 Crack Full Version With Key A: In the current 2019.3 version of PhpStorm you can activate the entire license for a single license key. It was introduced in the 2019.3 release of WebStorm. To activate your license, you just need to open File > New, select the “Enter License Key” template and enter a valid license key. Then hit “Next”, confirm your license key, and PhpStorm will be activated. Q: How to add EntityType field to form I've added field to my entity type which is: protected override void BuildMetadata(EntityMetadataContext context) { base.BuildMetadata(context); MetadataHelper.CreateEmptyEdmMetaDataProvider(context); this.AddMetadataToContext(context); this.Metadata.SetTypeName("Contoso.Example.Models.Entity"); } Then I've added this field in my view: @Html.EditorFor(model => model.Id, new { htmlAttributes = new { @class = "form-control" } }) And I have this error: CS1061: 'Microsoft.CSharp.RuntimeBinder.RuntimeBinderException': 'The best overload for method 'Microsoft.AspNetCore.Mvc.ViewFeatures.IViewContextProvider.CreateViewContext(Microsoft.AspNetCore.Mvc.IView, Microsoft.AspNetCore.Mvc.IViewDescriptor, Microsoft.AspNetCore.Mvc.ViewFeatures.IViewDataFeatures)' requires a receiver of type 'Microsoft.AspNetCore.Mvc.ViewFeatures.IViewContextProvider', but the type 'Models.Dto.SupplierDto.ViewDataModels.EditViewDataContainer' has no constructor taking any arguments What am I missing?
